Built-in daylight sensor

Sensor lamps are designed for use in locations where light is only needed when the surroundings darken. They prevent unnecessary illumination and electricity consumption during the day, but turn on automatically when the light level falls below 15 lux. The eco-friendly packages indicate the corresponding incandescent bulb, making the choice easier for consumers. Technical specifications are clearly presented. The colour temperatures are warm white and cool white (2700 K and 4000 K).
