

## Hole Dozer Holesaw - 33 mm - 1 pc | HOLE DOZER™ bi-metal holesaws

- Cutting edge technology for maximum productivity.
- O Tooth design A variable 4-6 teeth per inch tooth design with a positive 10° tooth angle provides the following benefits: Faster and more aggressive cut. Improved heat dispersion during cutting ensures that the teeth stay sharper for longer. Deeper curved gullets provide more efficient chip clearance preventing clogging and heat build up. Special shaped tooth angle has less tendency to snag on thinner materials. Teeth are alternate/side set to minimise binding and friction. Requires less feed pressure This is achieved by the combination of aggressive tooth geometry and good chip clearance resulting in the requirement of less force during drilling.
- O Tooth material Type Matrix II premium high speed steel is used for the toothed area of the holesaw. Matrix II steel contains 8% cobalt allowing the teeth to retain the original tooth hardness even at high working temperatures when used in metal cutting applications. - Bi-Metal construction -

Ø (inch)	1
Article Number	49560067
Diameter (mm)	33
Max. cutting depth (mm)	41
Pack quantity	1
