

## Hole Dozer Holesaw - 65 mm - 1 pc | HOLE DOZER™ bi-metal holesaws

- Cutting edge technology for maximum productivity.
- Tooth design - A variable 4-6 teeth per inch tooth design with a positive 10° tooth angle provides the following benefits:
  - Faster and more aggressive cut.
  - Improved heat dispersion during cutting ensures that the teeth stay sharper for longer.
  - Deeper curved gullets provide more efficient chip clearance preventing clogging and heat build up.
  - Special shaped tooth angle has less tendency to snag on thinner materials.
  - Teeth are alternate/side set to minimise binding and friction.
  - Requires less feed pressure - This is achieved by the combination of aggressive tooth geometry and good chip clearance resulting in the requirement of less force during drilling.
- Tooth material - Type Matrix II premium high speed steel is used for the toothed area of the holesaw. Matrix II steel contains 8% cobalt allowing the teeth to retain the original tooth hardness even at high working temperatures when used in metal cutting applications. - Bi-Metal construction -

Ø (inch)	2
Article Number	49560153
Diameter (mm)	65
Max. cutting depth (mm)	41
Pack quantity	1
